DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 and 2, drawn to process for producing cigarette pack, classified in class 493, subclass 129.
 - II. Claims 3-16, drawn to apparatus for producing cigarette pack, classified in class 493, subclass 70.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another and materially different process such as the one that uses the sealing station with the sealing jaws arranged at either side of the conveying path.

2. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and by their recognized divergent subject matter restriction for examination purposes as indicated is proper.

Art Unit: 3721

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
